**ALL IN –
WONDERWALL**

Lechner

THEWALL® BY LECHNER.

THEWALL by Lechner is an innovative wall system – and much more besides. Whatever is conceivable is feasible! THEWALL by Lechner is a patented, award-winning system consisting of a single component that is equipped with a transformer, cable and one or more current-carrying 4-phase rails. The number of rails is as individual as your requirements.

THEWALL® BY LECHNER – MAKES YOUR WALLS YOUR STAGE.

THEWALL by Lechner creates space that otherwise often remains unused and is relegated to a niche existence – your wall panels. Independent of an existing electrical installation, THEWALL by Lechner gives rooms real added value while giving you extra freedom. This is because you can equip THEWALL by Lechner to your heart's content with imaginative accessories that make your living space functional, beautiful and simply worth living in!

THEWALL® BY LECHNER – PLUG-AND-PLAY.

With a wide variety of accessories and a broad spectrum of functions THEWALL by Lechner can be individually configured and adapted to your requirements. The accessories are simply inserted into the busbars – exactly where and when you want them, either on a permanent or temporary basis. Whether current-carrying or currentless, our constantly growing portfolio of accessories is safe, easy to use and being constantly expanded.

MORE FUNCTIONS THAN A SWISS ARMY KNIFE.

THEWALL by Lechner is a wall system – and also so much more. Whether in offices or living spaces, surgeries, bathrooms or the entry corridors of domestic hallways, the immense variability of the available accessories allows THEWALL by Lechner to be used in countless different areas of life. And in partnership with renowned manufacturers, our broad range of accessories is constantly evolving. As different as their tasks may be, two things distinguish all our accessories: their ultra-flexible plug-and-play functionality and their modern, minimalist design language.

THEWALL® BY LECHNER – LIGHT, SOUND & POWER.

Socket outlets that change their position to suit your wishes, induction charging cradles for tablets and mobile phones precisely where you need them, LED spotlights for pinpoint lighting and a lightboard to perfectly stage your favourite objects. Thanks to the busbars, these sophisticated functional elements can be freely positioned as you see fit. And the ultra-flat, invisible sound system from audio specialist WHD also provides deep, rich sound – whenever and wherever you want!
